

Patient/Student Name:	Date of Birth:
-----------------------	----------------

You have consented to your child receiving healthcare services from Anchorage School Based Health Centers. ASBHC will create a medical record for your child. This information is separate from health information about your child in records maintained by the school nurse. Both types of records are confidential and are protected by two important laws. First, the Health Insurance Portability and Accountability Act (HIPAA) protects personal health information in medical records kept by ASBHC. Second, the Family Educational Rights and Privacy Act (FERPA) protects personal information in education records maintained by ASD and school nurses.

To accomplish this, it is important that information be shared between these providers regarding your student's current health and health history.

The laws discussed above provide that your child's health information is confidential and, in most instances, cannot be released to any person or agency without your written consent. However, the laws do permit healthcare providers to share information, without consent, if necessary to meet your child's treatment needs. Personal health information may be provided to the school nurse for the express purpose of the school nurse's assessment and medical treatment of a student. Personal information may also be shared with school counselors related to the academic and social-emotional well being of your student. Personal health information may also be shared between the SBHC and your primary physician in order to facilitate the care and treatment to your child when the i(s) -l(s) -l(m) l(e)our chillaa 2 (s) .2 (ors) a(t) 0ehien (s) -l lhd when e.2 (hiri
