- (simplified text from Readworks' "Voting and the Law")

When people vote, they pick someone. In the United States, people vote to choose the men and women who make the rules for everyone.

A long time ago, many people could not vote. Some men could vote. But women could not. Black people could not vote. Poor people and young people could not vote, too.

Now, many more people can vote. Voters must be citizens of the United States. They must be eighteen years or older. They also need to sign up to vote.

People vote for men and women called candidates. Candidates want to help make the rules. They need people to vote for them. Before people vote, candidates say what they will do if they win. They talk about their ideas. They might promise to change rules they do not like. They may also promise to make new rules.

Voters listen to these promises. Then they choose who they want to vote for. They vote on Election Day. To vote, they go to a building like a school. In some places, they vote on paper. In other places, they vote on a computer.

At the end of Election Day, all the votes are counted. Then everyone finds out who got the most votes. Soon, the winners will do what they promised.

5

SET 3

Write an equation for each number path.

$$\underline{\quad} - \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} - \underline{\quad} = \underline{\quad}$$

SET 4

Solve.

$$6 - 2 = \underline{\quad} \quad | \quad 2^2 = 3 - \underline{\quad}$$

$$2 - 2 = \underline{\quad}$$
