This semester-long class is a unique Steller class which could be structured to meet your Passages Community Service graduation requirement. This class allows students to expand their understanding of service learning. This class encourages students to plan, organize, and to run community service projects including, but not limited to: Temple of the Bean, fundraisers, clothing drives, Souper Steller, volunteering at non-profits, etc. Through this self-directed class, you'll learn organization, leadership, and communication skills.

This class will focus on studying and writing in three main genres: informational, narrative and argument. Students are encouraged to choose topics that are meaningful and relevant to them. We will focus on the purpose, the format, and the audience of the work. The course will also familiarize students with the MLA style of documentation. Understanding writing as a process will be a major focus with special emphasis on revision. Students will be encouraged to form habits of writing and reading through daily writer's notebook resêfl ssuring and seto intermeding

Video Production is a hands-on course on digital media creation. Learn how to shoot, edit, and produce high-quality audiovisual content for school and community audiences. The focus will be on broadcast journalism, communications, marketing, and community building. Skills you can learn include camera operation and cinematograpQ

indoor and outdoor activities. Activities may include: speedball, ultimate frisbee, floor hockey, non-contact lacrosse and many other activities based on student interests. In a aa

Students will focus on improving their number sense, mathematical reasoning, and problem solving. Students will practice basic math facts, learn the relationship between various number representations, begin looking at variables as agents of change, and practice the process to solve word problems. Students must work in an organized manner, use technology, practice communicating about math, and be willing to listen to differing viewpoints. This class will focus on using centers to practice needed skills and small group instruction to target individualized areas of need. A student that successfully completes this course will be ready for Pre-Algebra II.

Explore life science, physical science, and earth and space science through hands-on activities and inquiry-based learning. Build your own interactive notebook, allowing you to build strong

In this course, students will explore the timeless battle between light and darkness, good vs. evil. Through various engaging novels, students will encounter heroes, villains, and other complex characters who blur the lines between right and wrong and challenge our thinking about morality and justice. Students will use their critical thinking skills through discussion, creative projects, and analytical writing. Students are invited on a journey into the heart of the human struggle and realize that even in the darkest times, choices have the power to shape our destinies.

Students will focus on modern history in the United States and the rest of the world, starting at the turn of the 20th century. There is an emphasis on project-based learning to encourage active participation in our democratic society. Students are introduced to historiography, the use of chronological thinking in conjunction with historical comprehension, historical analysis, and interpretation. Geography, economics, government, and the humanities are used as a basis for examining the United States during these historical periods. There will be a focus on art, music, and literature as a form of human experience.

techniques, proper care of the instrument, and reading musical notation will be learned in a large group setting.

Hone the skills you need to get along and get ahead. This elective class gives you the skills and practice to be effective in any community by paying attention to your environment and the effect you have on it. While designed with special education IEP students in mind, this is a class for anyone who wants to improve their people skills. Learn and practice skills such as self-advocacy, emotional regulation, communication, self-presentation and self-perception, relationships, and problem solving. Individual needs and concerns will be addressed on a student-by-student basis (the class adapts to meet the needs/wants of students in the class).

This elective class uses games, roleplay, and mindbenders to learn and practice solving problems and facing challenges. We will work together to make and break all sorts of puzzles, challenging our minds and our fortitude. The class meets IEP requirements but it's designed for students who don't want to let obstacles get in their way. Students will develop logic tools and creative thinking as well as teamwork.
